

Final 368 Energy Transmission Corridors, Geothermal Power Resources, and Missed Opportunities for Renewable Energy in the Western United States

Missed Opportunity

Qualified Resource Area (WGA WREZ)*

* Some of the QRAs have not been screened for wildlife sensitivities, and some of the land within the QRAs may not be appropriate for renewables development.

Potential Energy Corridor on Federal Lands - WWEC Final PEIS**

- Corridor follows existing ROW (electrical transmission, pipeline, road or railroad).
- Corridor does not follow existing ROW.

** Corridor centerlines, rather than actual corridor footprints, are depicted.

Geothermal Power Plants (as of January 2008)

- Existing
- Proposed

Conventional Discovered Geothermal Sites

Geothermal Potential

- Low
- Medium
- High
- Very High
